About us!

## **AGROPERGAMOS**, who is it?

**AGROPERGAMOS** (Karabudak Tarım Hayvancılık Sanayi Tic. Inc.) is a fresh fruit brand that has been registered in 2012. The company located in Bergama, which a popular agricultural region of Izmir province. AGROPERGAMOS Co. is producing fresh fruits with GLOBALGAP and ITU certified rules for export.

The brand was inspired by the name of Pergamon used in ancient Greek period. Karabudak Agriculture and Animal Production Inc. by Metin Karabudak and Berce Real Estate Agriculture and Investment Inc. was established in Ankara in 2011. The company conducts its head office operations in Ankara.

In the company; also in Bergama; There is a orchard consisting of 100 hectares of area fresh fruit varieties at Çamtepe site and almond orchard is consisting of 20 hectares in Kaleardi region. In addition that; There is also a walnut garden of 130 hectares in the Sivas provincial area. At the same time, there is about 500 hectares of almond garden in the Granada region of Spain, which is undergoing investment.

**AGROPERGAMOS**, Agriculture and Research-Development studies have been realized in the company and the main investments focus on fresh fruit and shelled fruit. Cherry, plum, apricot, nectarine, walnut and almond are the main activities of production plan in the AGROPERGAMOS company.

**BERGAMA GARDEN**

**BERGAMA GARDEN**

## **CHERRY**

Cherry is one of the main export products of our country with 65.000 tons per year. Besides that, cherry is the leading product of **AGROPERGAMOS** Company's orchard in Bergama.

Both in terms of quality as well as productivity, cherries which stand out in Bergama region are demanding for our export besides the domestic market. In our orchard; a total of 29,622 certified cherry trees (44.4 hectares) were planted, including the Royal King-Regina, Kordia, Nordwonder, Summit and Early Lorry varieties.

The harvest period of the varieties in our orchard is between June 7<sup>th</sup> and June 20<sup>th</sup>. Within the 2018 production season, approximately 110 tons of cherry harvest is targeted from our 3 year old trees and it is predicted that our company's total cherry production will reach to 890.000 kg in 15 years period.

## **JAPANESE PLUM**

The Japanese plum, which has a wide production area in general, except for European Plums in our country. That is one of the most suitable fruit species produced for export when considering the climatic conditions of the region where the Bergama orchard is located of **AGROPERGAMOS** company .

In our orchard; there are total of 14,337 certified Japanese Plum Nursery Saplings, of which 215 (21.5 ha) have been planted, including Black Diamond, Black Splendor, Black Amber and Black Beauty varieties.

The harvest season of the varieties is between 20 June and 30 July. Our company targeting approximately 270 tons of plum harvest during the 2018 production season. Our products are targeted to export to European countries and Russia, especially to the Gulf countries in 2018 harvest season. Over the course of 15 years, our total Japanese Plum production is expected to reach 860,000 kg levels.

## APRICOT

APRICOT has been known as dry product last decades in Turkey, but known in recent years the apricot has a different economic value in the production because of new varieties started to grow in our country.

The new Apricot varieties have different properties in terms of product quality, production period and productivity as well as other products in the area of **AGROPERGAMOS** company orchard in Bergama.

In our orchard; Perla Cot, Tom Cot, Perfect Red, Flavour Cot, Tsunami, Spring Blush and Big Red varieties has been growing. A total of 2,547 certified apricot seedlings are planted on the field (3,8 ha).

The harvest season of the varieties are between May 10<sup>th</sup> and June 15<sup>th</sup> in **AGROPERGAMOS** orchard. During the 2018 production season, approximately 16 tons of apricot harvest is targeted from our 3 year old trees and it is predicted that our company's total apricot production will reach 150.000 kg levels in 15 years period. Apricot is the most preferred fruit after the Turkish cherries in the world, depends on fresh fruits export data's.

## **NECTARINE**

**AGROPERGAMOS** Company has determined another important issue in the fruit production activities carried out in the Bergama region as AR-GE studies.

The important place in the Research and Development studies is the kind of regional experiments being carried out with different rootstocks and varieties.

For this purpose, Nectarine-Peach Experimental Parcel was established with 537 pcs. Nectarine-peach certified trees for determine of investments we will make for the future. The varieties are very high quality products have been adapted to the season with great seasonal and climatic conditions. Main varieties have been planted in our trial area by our company; which they, Royal Glory, Silver Splendid, Sparkle and Venus. Nectarine-peach harvest date begins on May 20<sup>th</sup> and ends on July 30<sup>th</sup>.

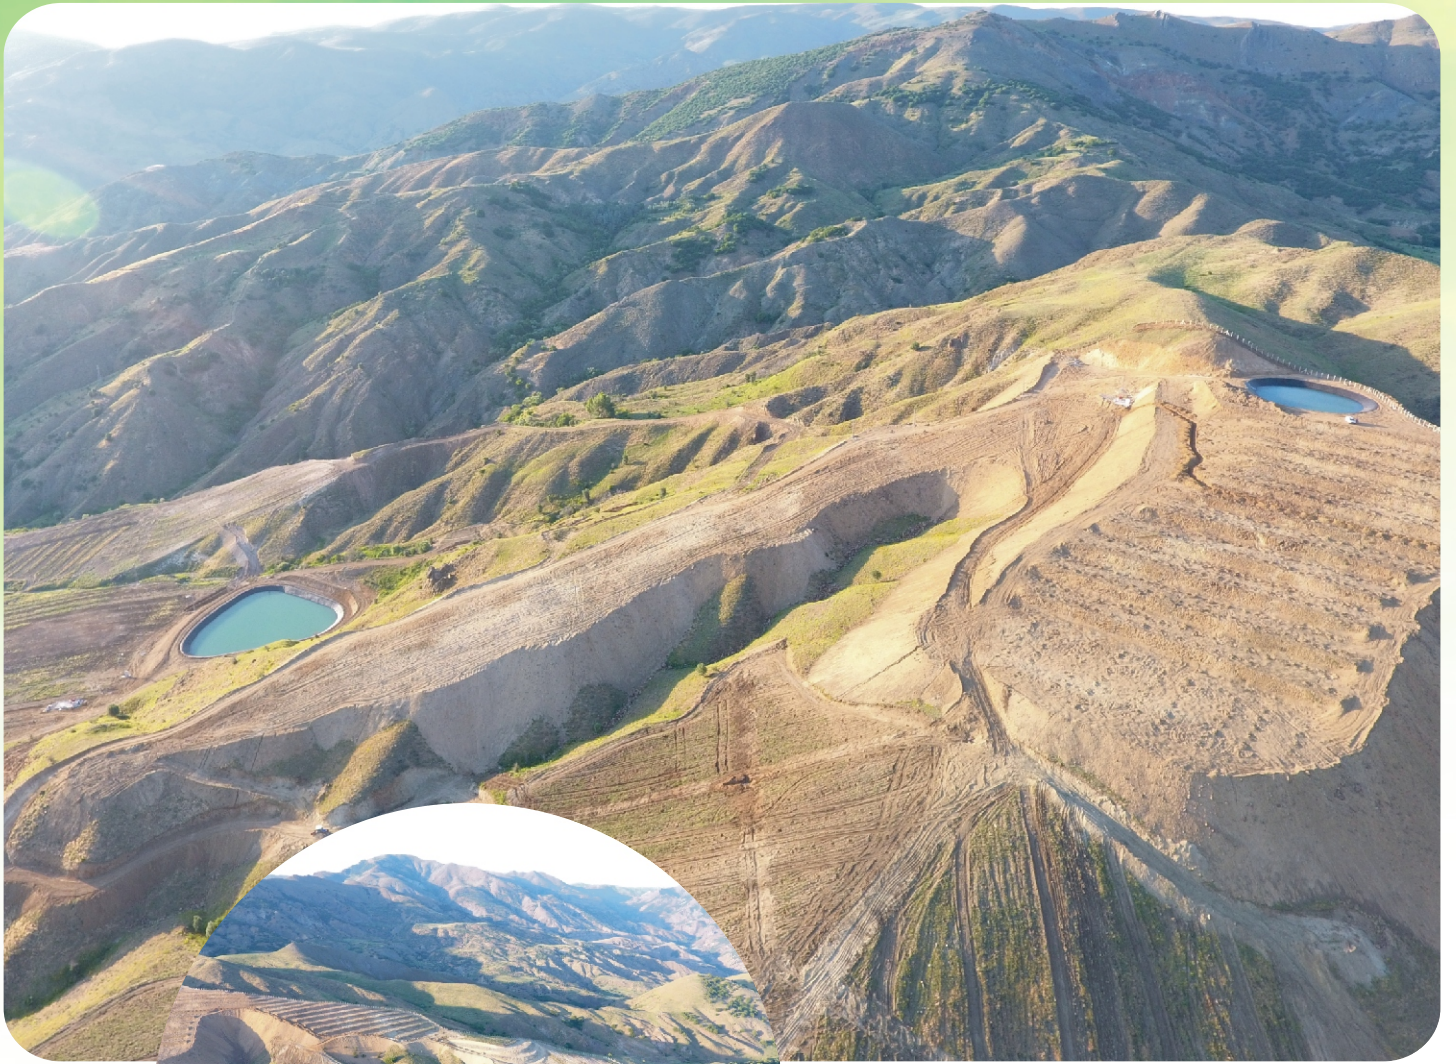

## ALMOND

**AGROPERGAMOS** Almond plantation was established on 130 ha fruit orchard at 2017. This orchard established as one of the modern almond orchard in our country with a total of 10,502 almond trees and 225 da (22,5 ha) planting areas in two different location of our production site in Bergama. It is envisaged that our almond production planned by our company will reach 150.000 kg levels in 15 years period. Production is starting with 30.000 kg on 5<sup>th</sup> year. Almond Plantation consists of **Ferragnes, Ferredual, Laurene, Vairo** and **Marinada** varieties which they have high market value and high productivity.

## **WALNUT:**

**AGROPERGAMOS** walnut plantation was established on 130 ha land at 2017. That walnut orchard is located in İmranlı (Sivas) region. Also this orchard is one of the biggest walnut plantations in Turkey, among the other walnut orchard investments.

In the walnut plantation established at **ARDICALAN**, 31.000 pcs of walnut saplings were planted in the year 2017 and 12.000 more saplings will be planted in the 2018-2019 season.

The walnut production planned by our company will start with 250.000 kg at the age of 6th and will reach to the level of 1.700.000 kg in 15 years time.

The walnut plantation consists of **Chandler, Fernor, Franquette, Fernette, Howard, Tulare, Ronde and Lara** varieties which they have high market value and high productivity.
